

# *Tulip Cups*

*THE CUP WITH  
THE CLEAN TASTE*

*Successor to the Com-  
mon Drinking Glass  
of Offensive Memory*

## *The Lips That Touch Glasses Taste Everybody's Germs*

Outside of your own home, you are entitled to a clean and dainty Tulip Paper Cup for every drink.

In your office or factory, in your hotel room, at the restaurant, you should be supplied with a white and firm Tulip Cup.

In hospitals, public buildings, railroad stations, etc., you will nearly always now find paper cups in place of the old common drinking glasses that spread all kinds of diseases from mouth to mouth.

How many of the influenza deaths came from germs spread by common germ-laden glasses cannot be told exactly, but the count is large.

Tulip Cups are an actual economy where distilled water is served, because more water is wasted trying to clean the glass than Tulip Cups would cost.

In any case, Tulip Cups are so inexpensive that you need not consider the cost for one moment.

Besides, Tulip Cups pay big dividends in health.

Remember, a clean glass in a public place is a rare bird.

Drink more water—you will feel better and work better. But avoid germs by insisting on Tulip Cups.

## *A Perfect Package*

Here is the perfect package for paper cups.

It is a self-dispensing box. Hang it on the wall and you need no glass fixture.

Tulip Cups will come out one at a time.

This is the package for factories, warehouses, and such places as the glass dispenser might be easily broken, for outings, trips, construction jobs, etc.

If you don't use Tulip Cups now, order a sample lot in the self-dispensing box. You will never return to the old scummy, suspicious glass.

Ask for No. 15 Tulip Cups in the self-dispensing box.

If a plain box, not self-dispensing, serves your purpose, then order No. 5.

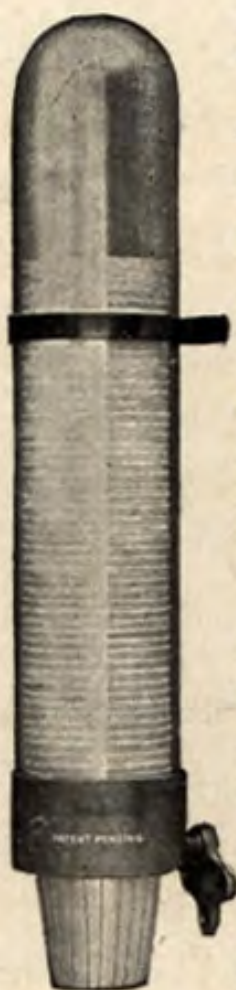

## *Tulip Fixtures*

This Tulip Glass fixture is a simple dispenser for Tulip Cups, simple to install and simple to operate. Consists of a glass tube and two nickel fixtures. An ornament for any office.

Below is shown the Tulip nickel-plated holder used by dentists, in restaurants, theatres, etc.

Other Tulip products include ice cream and sundae dishes, finger bowl liners, waxed paper cake baking cups, plain cake display cups, etc.

No. 50

No. 21
